New Renaissance Middle School

Access and Admissions Policy

At New Renaissance Middle School, our unwavering commitment is to provide an exceptional International Baccalaureate (IB) education that is accessible to a diverse range of students. We firmly believe in fostering an inclusive environment that not only promotes academic excellence but also nurtures creativity and a sense of global citizenship. To ensure that our commitment to inclusivity is upheld, we have established a robust Access and Admissions Policy that adheres to principles of transparency and fairness and is compliant with the Broward County Public School board admissions policies for a public school. This policy is designed to clearly outline the conditions for participation in our IB Middle Years Programme (MYP). New Renaissance Middle School operates the IB program as an Innovative Program for Broward County. Unlike District application processes for magnet programs, there is no centralized application process for students to apply for admission to our IB Innovative Program. Instead, all students enrolled in New Renaissance Middle School can receiving a worldly and active IB education.

1. **Admissions:** In accordance with Broward County admissions policies, the following applies to New Renaissance Middle School:
    a. **Eligibility:** All students attending a school where a School Board approved Innovative Program has been established can participate in the program. For students requiring an Individualized Educational Plan (IEP)/504 Plan, eligibility criteria align with state statutes. It's crucial to understand that reassignment approval does not guarantee placement into an Innovative Program.
    b. **District Application Process:** If the District determines available seats for students beyond the designated boundary of an Innovative Program school, parents/guardians may apply through the reassignment process as outlined by Broward County Public Schools.
    c. **Assignment Priority:** Students residing within the school's boundary enjoy priority for available Innovative Program seats before incoming students reassigned from outside the boundary. In cases where the Innovative Program qualifies as "special academic programs" per section 1003.05(3), Florida Statute, as amended, children of military families receive first preference.
    d. **Transportation:** Students attending their home-boundaried school will receive transportation per School Board Policy 5300.
    e. **Withdrawals:** Withdrawals for students attending their home-boundaried school will be granted in accordance with School Board Policy 5.1.
2. **Supporting Access**: New Renaissance Middle School is committed to creating opportunities that enable access to our MYP for the broadest possible range of students. We will:
    a. **Outreach and Engagement:** Engage with local communities and educational partners to actively promote our MYP and encourage a diverse range of applicants.

    b. **Information Sessions:** Host informational sessions and open houses to provide prospective students and their families with insights into our curriculum, values, and opportunities.
    c. **Community Partnerships:** Establish partnerships with organizations and entities that share our commitment to inclusive education, allowing us to identify and support potential students from underserved communities.
3. **Equal Opportunities Monitoring:** New Renaissance Middle School is dedicated to monitoring and evaluating our efforts to provide students with equal opportunities to undertake the MYP. To fulfill this commitment, we will:
    a. **Data Collection:** Collect data on the demographics of our student body to ensure that our admissions and access policies are aligning with our commitment to diversity and inclusivity.
    b. **Continuous Improvement:** Implement a continuous improvement cycle based on the results of our assessments, with the goal of enhancing equal opportunities for all students.

This comprehensive Access and Admissions Policy reflects our dedication to providing a world-class education to all students, regardless of their background or circumstances, while adhering to the principles of transparency and fairness. We continually strive to maintain an educational environment that celebrates diversity, fosters excellence, and empowers our students to become global citizens. Our Access and Admissions Policy is designed to be easily understood and accessible to all stakeholders, including prospective students and their families. We believe that informed choices are essential for both students and their parents or guardians. Therefore, our policy is readily available on the school's official website and can also be provided upon request.

Policy Review:

This policy will be reviewed on a yearly basis by the coordinator and staff, allowing for input from staff, parents, and students. The coordinator will adjust the policy as needed, ensuring compliance with IBO and BCPS policy components.

New Renaissance Middle School

Assessment Policy

PHILOSOPHY

At New Renaissance Middle School, we believe in using assessment to aid in the formation of instructional practices as well as a means of demonstrating proficiency. In addition, assessment is one way of providing feedback to both students and their families. It is important that we provide our students with real-world application and authentic assessments. This allows us to develop their critical thinking skills in a fast-paced, growing economy and society. In our effort to develop versatile critical thinkers, we strive to balance the number of state, local, and school mandated assessments with effective and informed teaching. We are committed to nurturing academic skills as well as talents in the arts, while ensuring standards are being mastered and demonstrated through differentiated approaches to learning.

PLANNING

Assessments allow faculty and staff the opportunity to collect, report, and record progress toward the desired learning outcome. We evaluate assessment results to make instructional decisions and adjust instruction when necessary. Our teachers are equipped with resources to drive our diverse group of students in a multicultural atmosphere. At our school, the assessor is not always the teacher. Peer assessments and self-assessments are also important to the learning process because it allows for authentic collaboration. Students are measured against set standards and the mastery of those standards rather than being measured against each other. A spiraling review schedule is used and standards are revisited throughout the year to further promote mastery of a given standard.

Mastery for Broward County Schools is considered 70% and above. Mastery is demonstrated in a variety of ways including quizzes, tests, performance-based tasks, projects, labs, speeches, summative assessments and formative assessments. Grades are recorded in Pinnacle, an online gradebook system, where students and families can monitor progress throughout the year. Report cards are issued four (4) times a year and interim grade reports are issued halfway through each quarter, also four times a year.

The following is a partial list of assessments used at NRMS:

District / State Assessments:

- F.A.I.R.
- Benchmark Assessments
- End-of-Course (EOC) Assessments
- Florida Standards Assessments (FSA)

- Next Generation Sunshine State Standards Assessments.

School Assessments:

- Standards-based common Assessments
- Formative Assessments
- Summative Assessments.

COLLATORATIVE PLANNING

Content area teachers attend weekly Professional Learning Communities (PLCs) which provides them an opportunity to plan collaboratively with other members of their department. Additionally, we have professional development meetings to provide us with rigorous reading strategies. Incorporating reading strategies into courses such as math and science allow deliberate practice of assessment requirements and expectations. Our collaborative planning of these content area groups focuses on a C.A.R.E. Cycle to drive instruction: curriculum, assessment, remediation and enrichment. This four-point process is revisited with each set of standards in all content areas. We collectively collect data to drive meaningful instruction.

REFLECTION

Teacher and students create time and space to reflect on assessment outcomes. Both teachers and students participate in data chats to discuss progress towards academic goals and achievement levels in references to learning scales. These data chats allow them to understand what competency level that they are on, and where they strive to be. Working together, we assess learning needs and create ways to make new learning gains.

MODIFICATIONS

When necessary, curriculum and assessments are modified for students with special needs or 504 plans. In addition, students are offered multiple opportunities to show mastery of standards with remediation of weak benchmarks and post assessments.

CROSS CURRICULAR TOOLS AND STRATEGIES

MYP objectives are incorporated through multiple assessment strategies and tools including:

- Models
- Graphic Organizers
- Rubrics
- Investigations
- Projects
- Journals
- Laboratories
- Research
- Performance and Presentations
- Speech and Debates

- Class Discussions
- Exams

SUBJECT ASSESSMENT TOOLS & STRATEGIES

Language Acquisition

- Oral responses in individual and group activities.
- Active reading and writing comprehension exercises

Individuals & Societies

- Research and essays.
- Social experiments and analyzing
- Classwork/Homework

Science

- Scientific Investigation and research
- Lab experiments that incorporate data collection, analyzation and forming conclusions.
- End of unit and term testing

Language and Literature

- Research and Essays
- Summative assessments

Mathematics

- Word problems and real-world application
- Mathematical Investigations
- Exams with a range of math problems

Arts

- Written and oral work
- Music concerts
- Dance recitals

Physical Education

- Performance of physical strengths and abilities

Design & Technology

- Innovative robotic creations
- Varied software application
- Modeling

REPORTING OF STUDENT'S ASSESSMENT

- Interim reports (quarterly)
- Report cards (quarterly)
- Open House (beginning of school year)
- Portfolios (quarterly – classrooms vary)
- Online (Pinnacle 24hr gradebook)
- Email (year-round)
- Phone calls (per need throughout school year)
- Parent-teacher conference per request (year-round)

GRADING

Formative Assessments:

- Teacher will input one grade per week as mandated by the school district. This grade may reflect a formative assessment.
- Teacher will provide students with adequate time and information to support mastery on formative assessments.

Extended Time

- Teacher will provide extended time because of individual accommodations required by the district.
- Student may utilize overtime with given parameters and accept that it precedes all extracurricular activities.

Retakes:

- Language acquisition / Individuals & Societies / Science / Art / Physical Education: Teacher will provide students with the opportunity to retake an exam due to exceptional circumstances> Exceptional circumstances include excessive absences and/or medical illness.
- Mathematics / Design & Technology: Teacher will provide students with the opportunity to retake an exam due to lack of proficiency. Thus, if the student engages in remediation to ensure competency of skill, a retake opportunity will be granted.

Grading:

- Teacher will provide students and parents with an outline/rubric of grading scales and expectations prior to submission of tasks.
- Teacher will provide students and parents with a translation of the MYP grading scale to the online pinnacle grading report.

GOALS

Our goals here at New Renaissance Middle are to ensure that each department collaborate to do the following:

- Provide teachers with the appropriate MYP training to maximize the subject area assessment criteria
- Utilize rubrics for comprehensive understanding of learning goals and expectations

- The school will engage parents to encourage and support student completion of tasks with effective studying habits and appropriate supplies through reporting

REVIEW

- This document will be under continuous review by the MYP coordinator and faculty with input from the district to provide an appropriate grading expectation for the school, the parent and student.

New Renaissance Middle School

Inclusion Policy

PHILOSOPHY

New Renaissance Middle School (NRMS) believes that all students can and should participate, to the extent that they are able, in the IB Middle Years Programme. Each student with special educational needs and/or English language learner identification is provided with the appropriate support to ensure academic success. The process begins with Response to intervention (RtI), which identifies struggling students and puts interventions in place in the classroom to help those students to be successful. If the student is successful with the interventions, the interventions may be left in place to support the student. If the student continues to struggle, the student may be made eligible for one of the Exceptional Student Education (ESE) programs. An Individual Education Plan (IEP) is developed, interventions are continued in the classroom, additional supports are added to assist the student, and alternate assessments are used if necessary.

PURPOSE

- To ensure that all students are provided appropriate access to our school's IB-enhanced curriculum and opportunities for academic rigor aligned with the goals of their IEP.
- To emphasize that all students and staff are encouraged to embody the mission and vision of the New Renaissance Middle School IB Middle Years Programme, as well as the Learner Profile.
- To explicitly state that we use the learner profile to support students as risk-takers, while promoting compassion, effective communication, and inclusion.
- To emphasize that we make efforts to design and implement a curriculum that is standards-based, creative, engaging, and differentiated to support all of our students in reaching their unique potential.
- To communicate the responsibilities of all stakeholders in the success of students requiring exceptional education services.

Broward County Schools are required to comply with all state and federal laws, including, but not limited to, the Individuals with Disabilities Education Act (IDEA), Section 504 of the Rehabilitation Act of 1973, Family Education and Privacy Act (FERPA), and Americans with Disabilities Act (ADA).

IDEA requires that schools provide special education services to eligible students as outlined in a student's Individualized Education Program (IEP). IDEA and Section 504 also provide specific requirements to guarantee a Free and Appropriate Public Education (FAPE) for

students with disabilities in the least restrictive environment (LRE). FAPE and LRE are the protected rights of every eligible child, in all fifty states and U.S. Territories.

The International Baccalaureate Organization, along with Broward County Public Schools, strive to provide an open, accessible MYP curriculum to all students whenever possible and whenever it proves to be in the student's best interest.

DISTRICT RESPONSIBILITIES

Broward County Public Schools are committed to providing inclusive services to students. The district will continue offering highly specialized services to those students who need them.

Vision
Work collaboratively to enhance educational opportunities for students with exceptionalities.

Mission
Collaborate with schools, families and community agencies to develop successful learners in the least restrictive environment. Inclusion opens the classroom to all students, allowing each student to benefit both academically and socially.

SCHOOL RESPONSIBILITIES

The mission of the Exceptional Student Education (ESE) Team at New Renaissance Middle School is to provide an individualized and rigorous education for students with disabilities. This education utilizes quality, data-driven and research based instructional methods, a collaborative and cooperative relationship between staff, families, and students, and an interactive and mutually supportive relationship among both general and exceptional educators, with adherence to the individualized education plans (IEPs) for all students with disabilities.

Our goal is to create an environment where all students with disabilities learn with our resources and support. We do what is always best for our students.

TEACHER RESPONSIBILITIES

General, ESE, and ESOL teachers collaborate in Professional Learning Communities (PLC) to ensure that all ESE, ESOL, and 504 students are accommodated, and are provided access to the curriculum as specified by their respective plans. Alternate materials and assessments are procured to coordinate with teacher unit plans.

PARENTS' RESPONSIBILITIES

School faculty, staff and teachers partner with parents to fully support students in their academic performance. It is imperative that parents ensure that students' attendance remain a priority and continue to work closely with the ESE Specialist to ensure that the IEP goals are

met. Parents can access Pinnacle, an on-line record of student grades and assignments, to monitor the student's progress. All on-line programs are accessible from home including; i-Ready Math and Reading, MasteryConnect, etc. Parents are able to access Pinnacle to see what assignments are due or missing and allow the student to access the assignments at home.

Policy Review:

This policy will be reviewed on a yearly basis by the coordinator and staff, allowing for input from staff, parents, and students. The coordinator will adjust the policy as needed, ensuring compliance with IBO and BCPS policy components.

DEFINITIONS

Exceptional Student Education (ESE) refers to services for students that have been identified as being eligible for a disability. Most services and accommodations are delivered in the general education classroom for a total inclusion experience. We recognize that a continuum of services is necessary to provide access to the curriculum, including services targeting learning disabilities, language impairment, behavioral disabilities, and other health impairments.

Differentiated instruction is provided to modify the curriculum for all ESE, gifted and bilingual/ESOL students to ensure that we are providing an education to meet individual needs.

New Renaissance Middle School

Language Policy

PHILOSOPHY

New Renaissance Middle School provides a language learning framework to prepare students to be college and career ready. We understand that language development is an important tool needed for students to successful from middle school and beyond. All teachers, regardless of their content area, are language facilitators and are committed to ensuring all students' language needs are being met. Teachers collaborate and lessons build on each other to ensure that students are making interdisciplinary connections, regarding language. Promoting language in all classes allows us to make sure our students are college and career ready when they leave our school.

NRMS students are expected to achieve a proficient level of oral and written skills in English. We also strongly encourage and support students who are learning a second language. All students in grades 6-8 study English and many learn Spanish as a second language through our Spanish foreign language elective. Students registered in the Spanish foreign language elective can earn high school credit upon successful completion of the necessary courses. Approximately 24% of our students are learning or speak a second language. On campus we have many students who speak Haitian- Creole, Vietnamese, Spanish and Portuguese.

MOTHER TONGUE

Most of the students on campus speak English, therefore English is considered the mother tongue. English is promoted in all classes, in all grades, and through the following school experiences and activities:

- Discussions and analytical writing taking place in all classes
- Cross-curricular essay writing
- Inquiry based questioning
- Accountable talk modeled discussions
- Use of class notebooks and interactive Reading, Language Arts and Science notebooks
- Student completed written reflections that are based on:
    - Community and Service/Action hour completion
    - End of semester self-assessments
    - Field trips, assemblies, in-school activities, unit projects
- Directed and individualized notetaking across subject areas
- Science lab reports, virtual lessons, and projects

Last reviewed: May 2023

- Research papers
- Achieve 3000 reading assignments
- Presentations (written/oral)
    - In-class
    - Virtual (Canvas)
- Narrative response (short constructed responses for "real world math" problems)
- Student led news broadcasts
- Use of cross-curricular graphic organizers
- Short constructed response on formative and summative assessments in all classes
- Written responses to math word problems
- Access to ELL based clubs and support groups
- Inclusion of literature from different cultures present on campus
- Multi-Tiered System of Supports/Response to Intervention (MTSS/RtI)

LANGUAGE ACQUISITION

ESOL Program: Due to the growing number of international students attending NRMS, our inclusive ESOL program allows students to attend traditional class with guided support from their peers and teachers. Students are also provided with additional small group support from an ESOL teacher and staff to help them learn, explore, and practice English.

Related Arts: Language Acquisition is offered to all students in grades 6-8 as an elective. This provides the students with an opportunity to learn about other languages, cultures, customs, and traditions. However, due to limited staffing, Spanish is currently the only foreign language NRMS offers now.

High School Credit: Language Acquisition (Spanish) is offered to students in the 7th and 8th grade and is a two-year course. This course is set to mimic that of the high school course offerings. Students can opt into these classes and are placed on their proficiency in English-Language Arts on the Florida Standards Assessment.

SCHOOL RESPONSIBILITIES

At NRMS, it is our duty and responsibility to create a safe learning environment for all students as they develop and progress in their language abilities. Students need to feel comfortable to express their thoughts and ideas either verbally or written to make academic and personal gains in language. NRMS gives students a variety of opportunities to take risk and learn from their mistakes while participating in authentic and challenging work.

TEACHER RESPONSIBILITIES

It is the responsibility of the teachers to provide students with thought-provoking and challenging opportunities for students to create, use and analyze reading and writing materials.

STUDENTS RESPONSIBILITIES

It is the responsibility of the students to complete their assignments demonstrating their language competency. Students are responsible for participating in class discussions, projects, presentations, and various daily assignments to practice and improve their reading, writing, speaking and listening skills.

DEFINITIONS

Mother Tongue Development- Due to the growing number of non-native English speakers entering NRMS, we have a highly qualified ESOL instructor who oversees for the language instruction and development of all students on campus. We have an itinerant instructor/support facilitator for the Haitian-Creole students at our school. This person pushes into classrooms and provides academic support for students in the classes that they struggle the most. In addition, students are encouraged to use translators in classes, work with a peer, and documents are translated into their native language.

Professional Development- All teachers at NRMS are required to participate in professional development which include strategies on infusing literacy across all content areas. Professional development meetings are led by the school's literacy coach, department heads, and Broward County Public School district personnel. Various language development support is provided, for example, interdisciplinary writing strategies, writing in response to informational and literature pieces of text, and technology-based learning websites. NRMS has also focused on a variety of different resources for effective teaching and learning by incorporating Marzano teaching strategies, the Depth of Knowledge model, and Begin with the End in Mind strategy.

Parent Involvement- We encourage the parents to participate and be involved in students' academic and extracurricular activities. We communicate with parents through a variety of ways. We contact parents through email, phone, mid-nine-week interim reports, agenda letters, quarterly report cards, and parent conferences. Keeping the lines of communication open with parents allows them to participate in the student language profile development.

Policy Review:

This policy will be reviewed on a yearly basis by the coordinator and staff, allowing for input from staff, parents, and students. The coordinator will adjust the policy as needed, ensuring compliance with IBO and BCPS policy components.

New Renaissance Middle School

Honesty Policy

PHILOSOPHY

The International Baccalaureate Programme Academic Honesty Policy adheres to the Broward County Public Schools (BCPS) district-wide policy for academic honesty and aligns with the mission and vision of the district and IB Programmes. This policy strives to promote personal integrity as well as lend support to a culture of academic honesty. This policy will promoted and connected to the Learner Profile, "Principled".

DISTRICT POLICY

The Code of Student Conduct provides support for academic honesty through its own policy. It states that: "*misrepresenting oneself of cheating, copying, plagiarizing, counterfeiting, using false identification, or making false reports by posing as a parent to excuse absences or tardiness, sign a report card, etc.*"

Source: Broward County Code of Student Conduct, Section II Respect for Persons and Property

School Responsibilities

The Middle Years Programme (MYP) schools provide a safe place for students by assisting students as they develop their inquiry skills, take appropriate risk, and learn from their mistake while engaging in authentic work. Schools rely heavily on partnerships with parents, community members, teachers, and students to educate children on the ethics and values of academic honestly.

Teacher Responsibilities

It is the responsibility of the teachers to provide opportunities for students to develop and produce authentic original work. Instructors are also charged with teaching students' citation and research procedures, what constitutes misuse or plagiarism, and to provide instruction in self-management, social awareness, communication techniques, critical thinking, and ethical research skills. Teachers will not only teach academic honesty but will also model good practice. Administrators will support them in this effort.

Parent & Community Responsibilities

The Middle Years Programmes in BCPS recognize the important role that parents play in working with the schools to ensure that students are successful. Parent support of this academic policy will enhance student learning as they strive to produce work that adheres to ethical norms and demonstrates the use of principled behaviors. Parents should become

informed of the expectations placed on students and support these practices both inside and outside the school building. Community members should take advantage of the expertise and resources of the school librarian when questions arise about plagiarism, copyright, other ethical issues, and good academic practice for referencing sources. All community members, working together under the same understanding, will create the environment that promotes academic integrity and student success.

Student Responsibilities

It is an expectation that all students produce authentic works and adhere to district, school and IB MYP policies. Students should have the opportunity to make mistakes and learn from those mistakes.

The Broward County Public Schools Student Code of Conduct helps guide our focus on academic honesty and integrity. We use the Student Code of Conduct to help students develop appropriate decision-making skills and work habits. We recognize that, with the support of the Student Code of Conduct:

- Students should take responsibility for their work.
- Students should produce individual, original work unless otherwise instructed.
- Through accountable talk and academic citation conventions, students will give credit to other people working in group.
- Students do not copy the work of others.
- Students cite sources according to agreed-upon, age-appropriate formats.
- Students use information technology and library resources responsibly.

The following definitions, guidelines and procedures allow students the opportunity to learn from their mistakes as they develop skills and characteristics to assume the mantle for their own learning.

Group Collaboration Guidelines

While we recognize that learning is a social endeavor, guidelines are established for work produced within a group or partnership. The following points clarify our expectations for such work:

- Students are expected to know that the purpose of an assessment (summative or formative) is to show what they know, understand, and can do and must provide their own contribution to group work. If there is any part of the collaborative project that is unclear, it is the student's responsibility to seek clarification from the instructor.
- When students are expected to work together, they recognize and encourage contributions of others in the group.
- No individual student should complete the work of the group and try to submit it as a collaborative effort.
- Each group member takes responsibility for his or her own roles/tasks and ensure that the other members of the group understand the task and their responsibilities.

- When a product is required from a group, the product should reflect each member's contribution.
- Each student's work should be explicitly acknowledged.
- Each student will reflect on his or her participation and the participation of the other members of the group.
- Students will reflect on the group's processing and communication.
- Students will always appropriately give credit to any outside research used to inform their product using age-appropriate citation formats.

Any concern about collaboration work or products should be addressed within the group and with the teacher immediately.

GRADING PROCEDURES

Student performance will be evaluated and reported based upon mastery of standards.

Middle School Course without an EOC:

A student earns points for the letter grade achieved in each marking period (i.e., quarter) of a middle school course (F.S. 1003.437) according to the following chart:

Numerical	Progress	Letter Grade	Marking Period Points
90-100	Superior Progress	A	4
87-89	Outstanding Progress	B+	3.1
80-86	Commendable Progress	B	3
77-79	Above Average Progress	C+	2.1
70-76	Average Progress	C	2
67-69	Below Average Progress	D+	1.1
60-66	Lowest Acceptable Progress	D	1
0-59	Failure	F	0
N/A	Incomplete	I	0

Middle School Course with a State EOC:

A student enrolled in a middle school course (i.e., Civics) that requires the statewide, standardized EOC assessment to constitute 30% of the final course grade will earn points for the level achieved on the EOC and corresponding letter grade.

A grade of Incomplete ("I") is given as an opportunity for students to make up incomplete class work, a statewide, standardized End-of- Course (EOC) assessment, or for students who require additional time to demonstrate mastery of course standards. Class work should be made up prior to the end of the next marking period. If the work remains incomplete or unsatisfactory at the end of this marking period, the "I" will convert to an "F" grade. The principal may extend the deadline.

The student's final course grade will be determined by totaling the Converted Full Year Points and EOC points.

Source: Excerpt from Broward County Public Schools, Policy 6000.1 - Student Progression Plan (Revised 6/21/16)

Consequences

Consequences for academic malpractice include, but are not limited to, resubmission of original work, loss of privileges, further restriction of assessment environment, in school suspension, out of school suspension, and/or reduction of effort grade.

Policy Review

This policy will be reviewed on a yearly basis by the coordinator and staff, allowing for input from staff, parents, and students. The coordinator will adjust the policy as needed, ensuring compliance with IBO and BCPS policy components.

DEFINITIONS

The following definitions and examples will enable students to have a clear picture of what is permissible and what is not.

Academic Dishonesty can be also referred to as "malpractice." Malpractice includes plagiarism, copying, collusion, duplication of work, falsifying of data, or any other behavior that offers an unfair advantage to a student or that affects the results of another student. When parents or other adults complete an assignment for a student, it is also considered academic dishonesty and is subject to due consequences.

Plagiarism is taking ideas or works of another and claiming it as an original piece of work. Example: submitting an essay that is copied and pasted from the internet that is written and published by another author or source. Additionally, copying verbatim, or almost verbatim, from a website or other source, and inserting it into an essay or paper without proper citation is considered plagiarism.

Copying is taking the work of another or submitting it as his/her own. Example: taking another student's work, erasing the name and substituting one's own name, or transferring someone else's answers onto a homework or classwork assignment.

Cheating is using or sharing answers during a test or assessment. Example: looking at another student's answers on a test and copying his/her answer. Viewing another student's work during an assessment without specific permission from the teacher is considered cheating.

Duplicating is turning in the same assignment for different classes without the permission of the teachers. Example: an assignment that is given by the History teacher to write paper on the causes of the Civil War, is also turned into the English teacher to satisfy the requirement of writing an informational text without the teachers' knowledge that the same paper is being used to satisfy two assignments.

Falsifying data is purposely changing, removing or adding data of a lab report or another source to result in the desired outcome. Example: making up data to include in a lab report or changing actual lab report data to fit a desired result.

Collusion is helping another to be dishonest by allowing him/her to copy work. Example: telling another student what was on a test before he/she takes the same test, or sharing data from an experiment, or allowing another student to turn in as his/her own product.

Paraphrasing is restating another person's words using one's own words. This is permissible when paraphrasing does not become copying or plagiarizing. Example: reviewing a magazine article and restating one of the author's sentences using the student's own age-appropriate words.

Summarizing is the process of giving a brief description of another's main points. This is permissible when summarizing does not become copying or plagiarizing. Example: reading an article on a website, and describing, in the student's own words, the main points the author made.
